

Topic: Anchor prime one hundred watts wall charger

(1) Opening:

[54461, "Alright guys moving on to our next item here we have another prime, so we have anchor prime the one hundred watt wall charger."]

(2) Product Description:

[54462, "The last one was sixty seven watts. This one is one hundred watts, so this one is thirty three watts stronger."]

[54463, "It has three ports again a usb, a two usb c outlets and anchor has done the work for you. As you can see the middle outlet, the usb c."]

[54464, "So that's going to be the outlet you use for your laptop, and then the outlet just below has a phone attached to it, so that one's telling you that's the best outlet to charge your phone, okay."]

[54465, "It's great to charge your phone, your tablet, your notebooks, your laptops, all from one single charger."]

[54466, "And again, experience exceptional power and a remarkably compact charger that is forty three percent smaller than the original charger for the macbook."]

(3) Price:

[54468, "That discount code will be anchored live eleven. You're getting twenty five percent off and that brings your price down to six thousand three hundred seventy five."]

(4) Order Urging:

[54467, "Ultra sleek, ultra lightweight, something to throw in the bag while you are on the go, so go ahead and throw this one in your cart."]

B OLP prompt on the OLP-MINI dataset

Topic finder:

Please read sentence by sentence and determine which items are being sold in the following sentences. {slice_txt}. Only select the items with price, and answer in the format of ["item 1: price 1", "item 2: price 2", "item 3: price 3"] in the order of appearance.

Topic locator:

Please read the following paragraph sentence by sentence from front to back and extract the number of the first sentence that introduces {topic} and its subclasses, and read the paragraph sentence by sentence from back to front and extract the number of the last sentence that introduces {topic} and its subclasses. {slice_txt}. Please read the above paragraph sentence by sentence from front to back and extract the number of the first sentence that introduces {topic} and its subclasses, and read the paragraph sentence by sentence from back to front and extract the number of the last sentence that introduces {topic} and its subclasses. Explain your thought process, and finally, answer with a list [number of the first sentence, number of the last sentence].

Relationship checker:

Are {topic1} and {topic2} the same product on eBay? Please answer by 'Yes, they are' or 'No, they aren't'. Do not output any other content.

Please combine {topic1} and {topic2} into one item and remember not to output any other content.

Content organizer:

Please extract the sentences related to {topic} from the following document through 4 categories: (1) Opening, (2) Order Urging, (3) Price, (4) Product Description." {slice_txt}. Remember to extract the sentences related to {topic} and place them into 4 categories: (1) Opening:, (2) Order Urging:, (3) Price:, (4) Product Description:, and answer in the format of [sentence index, sentence].

Board member:

- Question: {question}. - Answer: {answer}. Do you think the content and the format of the answer are correct? {repeat_rules}. If they are correct, please answer 'Both content and format are correct!'; If not, please answer 'No, they are wrong', and output the correct answer. {repeat_rules}. Remember to put the correct answer behind 'Correct answer: '

Topic: Trump Denies Russian Scandal, Calls Media “Fake News”; CNN Contributor Jeffrey Lord Defends Press Conference Performance**(1) Facts:**

[21995, “President Donald Trump’s press conference had many people talking. Addressing the scandal involving former national security advisor Gen. Michael Flynn, Trump said ‘Russia is fake news.’”]

[22000, “Tapper later mentioned a reporter from NBC who called out President Trump for incessantly calling the media ‘fake news’ while also ‘saying things that are not true,’ noting the reporter was asking, ‘How do you have credibility to call us fake news?’”]

(2) Opinions:

[21996, “In reality, Trump gave a weapons-grade crazy 77-minute press conference. However, CNN contributor and Trump supporter Jeffrey Lord had a different take on that ‘meltdown.’”]

[21997, “‘From my perspective, I thought he was relaxed, he was funny, he was on point. He took the whole issue of the media, and he had a very candid conversation,’ Lord said. ‘This is the kind of conversation that I personally had with him a couple years ago in which he said some version of this same thing that he said today, except he was more specific.’”]

[21998, “Lord described the president as ‘candid, very dedicated to the job, very in command.’”]

[22001, “‘I think it was a simple mistake,’ replied Lord, calling the reporter’s question ‘nitpicky.’ He then proceeded to launch an attack on the network.”]

(3) Assumptions:

[21999, “‘What about some of the back and forth that he had with reporters? Is that really presidential four weeks into a new term?’ Blitzer asked. ‘I think this is going to be his presidential style,’ Lord replied.”]

(4) Future Plans:

[None in the provided text]

D OLP prompt on the LongBench MultiNews dataset

Topic finder:

Please determine the news topics in the following paragraph, read each sentence from beginning to end, and when several topics have an inclusive relationship, only output the parent category topic. {slice_txt}. Read from beginning to end, sentence by sentence, and in the context of the surrounding text, determine what news topics are present in the above paragraph. There are often clear jumps between different topics. Then answer in the format of ["(fill in short title 1)", "(fill in short title 2)", "(fill in short title 3)"]. When several topics have an inclusive relationship, only output the parent topic. Remember to output in the list format and do not output any content other than the topic list.

Topic locator:

Please read the following paragraph sentence by sentence from front to back and extract the number of the first sentence that introduces {topic} and its subclasses, and read the paragraph sentence by sentence from back to front and extract the number of the last sentence that introduces {topic} and its subclasses. {slice_txt}. Please read the above paragraph sentence by sentence from front to back and extract the number of the first sentence that introduces {topic} and its subclasses, and read the paragraph sentence by sentence from back to front and extract the number of the last sentence that introduces {topic} and its subclasses. Explain your thought process, and finally, answer with a list [number of the first sentence, number of the last sentence].

Relationship checker:

Are {topic1} and {topic2} related topics? Please answer by 'Yes, they are' or 'No, they aren't'. Do not output any other content.

Please combine {topic1} and {topic2} into one title and remember not to output any other content.

Content organizer:

Please place EACH AND EVERY sentence from the first to the last sentences in any subtle relationship to {topic} and things associated with it into the most appropriate ONE of the four entries in UNCHANGED sequence: '(1) Future Plans: (2) Assumptions: (3) Opinions: (4) Facts: ', from the following document. {slicetxt}. Remember to place EACH AND EVERY sentence from the first to the last sentences in any subtle relationship to {topic} and things associated with it into the most appropriate ONE of the 4 entries in UNCHANGED sequence: '(1) Future Plans: (2) Assumptions: (3) Opinions: (4) Facts: ', in the original list format of [sentence index, sentence] WITHOUT ANY REPETITION OR OMISSION.

Board member:

- Question: {question}. - Answer: {answer}. Do you think the content and the format of the answer are correct? {repeat_rules}. If they are correct, please answer 'Both content and format are correct!'; If not, please answer 'No, they are wrong', and output the correct answer. {repeat_rules}. Remember to put the correct answer behind 'Correct answer: '

Topic: "Context_2_chunk_6"**(1) Summary in Chronological Order**

This chunk appears to be a series of fragmented narrative passages that describe the thoughts, emotions, and actions of various characters in a complex, stream-of-consciousness style. The events are not strictly linear, but they seem to revolve around themes of beauty, loss, memory, and the passage of time. Key elements include characters reflecting on their relationships, the impact of death, and the struggle to capture fleeting moments through art. The narrative often shifts between different characters' perspectives, such as Pete, Mr. Merida, Seb, and Annalisa, each contemplating their own experiences and the world around them.

(2) Important Sentences Related to Deaths

Mrs. Bronwyn: Sentence 681: "Oh Mrs Bronwyn! she called out silently, to that essence which sat by the boat, that abstract one made of her, that woman in grey, as if to abuse her for having gone, and then having gone, come back again." Sentence 692: "For days after she had heard of her death she had seen her thus, putting her wreath to her forehead and going unquestioningly with her companion, a shadow, across the fields." Reason: These sentences explicitly mention Mrs. Bronwyn's death and its impact on the characters. Mrs. Deandra: No relevant sentences found: The text does not mention a character named Mrs. Deandra or any related death. Rosemarie: No relevant sentences found: The text does not mention a character named Rosemarie or any related death. Cael: Sentence 742: "There was a famous man now called Merida, she smiled, thinking how many shapes one person might wear, how he was that in the newspapers, but here the same as he had always been. He looked the same—greyer, rather. Yes, he looked the same, but somebody had said, she recalled, that when he had heard of Cael Bronwyn's death (he was killed in a second by a shell; he should have been a great mathematician) Mr Merida had 'lost all interest in life.'" Reason: This sentence mentions Cael's death and its impact on Mr. Merida.

(3) Who is the Final to Perish?

Based on the information provided in this chunk: Mrs. Bronwyn is mentioned as having died, and her death is a significant event in the narrative. Cael is also mentioned as having died in a shell explosion. There is no mention of the deaths of Mrs. Deandra or Rosemarie in the provided text. Therefore, it is not possible to determine who is the final to perish among the four characters listed, as only two of them (Mrs. Bronwyn and Cael) are confirmed to have died in the text.

F OLP prompt on the InfiniteBench Longbook_QA_eng dataset

{slice_txt} Please (1) briefly summarize the above chunk in chronological order. (2) Extract the most important sentences related to {aspect_abstracted_from_the_question} from the original text and note the sentence numbers. There is no need to quote the original sentences, but the reasons should be explained. (3) Try to answer the question about {the_question}. The original text may not contain a complete answer, but it is still possible to provide a partial answer.
